

Motivating Application Typology:

- (1) **Open Digital Infrastructure** - Technologies and protocols that are used as foundational tools within digital services that anyone with technical sophistication could create, configure, or deploy.
 - (CNP) Core networking protocols
 - (AUT) Authentication mechanisms
 - (1-BLK) Blockchains
 - (ML) Machine learning
 - (NWT) Network telemetry
 - (DAD) Data aggregation
- (2) **Proprietary digital infrastructure** - Technologies and protocols that are used as foundational tools within digital services but are highly centralized or require significant capital to create, configure, or deploy.
 - (CC) Cloud computation
 - (DDC) Databases and Data Centers
 - (HWM) Hardware manufacturers
- (3) **Governance, civic work, and physical infrastructure** - Technologies that governments directly manage, citizens interact with as part of their civic engagement, or are embedded directly into our physical infrastructure.
 - (DPI) Digitized physical infrastructure
 - (SPG) Statistics used in public governance
 - (PH) Public health, including COVID-19
 - (NIST) National Institute of Standards and Technology
 - (VOT) Voters and voting systems
 - (GVE) Governance, governments, and government employees
 - (LE) Law enforcement
 - (NGO) Non-governmental organizations
- (4) **Products and features provided by organizations (both for-profit and non-profit)** - Technologies that serve to improve the product, service, or other kind of commercial object offered by a company to end-users.
 - (ADD) Digital advertising
 - (WEB) Web services
 - (MSG) Messaging services
 - (LOC) Location services
 - (BNK) Banking
 - (PWD) Password managers
 - (DLD) Data leak detection
 - (RS) Ride sharing
 - (SE) Software Engineering

(5) Specifically named groups of people - Explicit references to peoples.

- (JUR) Journalists
- (ACT) Activists
- (MIN) Minorities, people experiencing marginalization, or those lacking access to resources
- (PGTS) People experiencing government surveillance or censorship
- (IPS) People experiencing interpersonal surveillance or abuse

(6) Finance - Technological tools that are used to facilitate the flow of currencies, assets, and values

- (6-BLK) Blockchains
- (BNK) Banking
- (CUR) Currenties, e-cash, post-quantum cash
- (ASC) Auctions and smart contracts

(7) Non-categorized motivating applications

- (CRY) Cryptographers and related academics
- (PQC) Post-quantum developments
- (BMD) Bioinformatics and medical data
